Green Pharmacy Conference 2017

The environmental cycle of pharmaceuticals

An incentive for innovation in the human and
veterinary medicine chain

October 27th 2017 | 09:00-17:00 | UMC Utrecht
Heidelberglaan 100 | Utrecht | The Netherlands

Worldwide, a cocktail of pharmaceuticals and multi-resistant bacteria of human and animal origin is found in (drinking) water, soil, food, crops and air. The healthcare sector is looking for solutions to this societal challenge. During the conference concrete options for action will be presented that reduce the risks associated with this cycle.
